

I am in total agreement with the FISTS petition RM-10811.  
This makes the most sense of anything I have read.

Originally I had thought it would be in the best interest of amateur radio to eliminate morse requirements entirely, but I can see I was wrong. The FISTS petition offers incentive to amateurs to improve their level of operating skill instead of giving them everything, and it preserves morse code, an important part of our history and everyday communication.

It is my hope that the FCC will give great weight to the FISTS petition.
